

Beekeeping in the Pacific Northwest 2015

Join us for our Beekeeping Course Saturday June 6th, 2015 8:30am-4:30pm here at our West Sound Beekeeping Association located at Stedman Bee Supplies. This course is for those beekeepers that have already taken the Basic course or for have kept bees for a season and are ready to learn more about managing their hives in the Pacific Northwest.

Some beekeepers have kept bees for years, but because they keep repeating the same mistakes they are not gaining years of beekeeping experience. Instead they are stuck in being a first year beekeeper year after year. Take the next step, and leap into becoming a better beekeeper! We'll take a more in depth look at swarm prevention, splits, overwintering hives, pests & disease diagnosis, treatment and prevention, increase honey yields and tricks of the trade.

For first year beekeepers, it is extremely important to learn how to work with the bees rather than against them. Not only do you get the substance of the class, but watching how experienced beekeepers work with their bees in the apiary is also extremely valuable.

There will be hands on demonstrations in the afternoon so all beekeepers must bring a hat and veil or suit. You will have the opportunity to participate in activities such as making splits, sugar rolls, sugar dusting and mite counts, hygienic testing, etc.

Beekeeping in the Pacific Northwest 2015

Saturday June 6, 2015
Silverdale, Washington
